

CTNNB1 (S37Y)

Catalog Number: 26296

Gene Symbol: CTNNB1

Description: Anti-CTNNB1 (S37Y) Mouse Monoclonal Antibody

Background: CTNNB1 protein is a dual function protein. It is a subunit of a complex of proteins that form adherens junctions, which are important for the establishment and maintenance of epithelial cell layers by regulating cell growth and adhesion between adjacent cells. CTNNB1 protein also pulls double duty as an intracellular signal transducer in the Wnt signaling pathway. Mutations have been implicated in the pathogenesis of several cancers.

Immunogen: A synthetic peptide from the internal region of CTNNB1 which includes the mutation of S37Y, human origin.

Tested applications: ELISA, WB, IHC

Recommended dilutions:

ELISA: 1:1000-1:5000

WB: 1:500-1:2000

IHC: 1:50-1:100

Concentration: 1 mg/ml

Host: Mouse

Clonality: Monoclonal

Purity: Purified from ascites

Format: Liquid

Storage buffer:

Preservative: no

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 50% glycerol

Species Reactivity: Recognizes S37Y mutant, but not wild-type CTNNB1 of vertebrates.

Storage Conditions: Store at -20°C. Avoid freeze / thaw cycles.

Western blot:

Western blot analysis of recombinant CTNNB1 (S37Y) and wildtype proteins.

Purified His-tagged CTNNB1 (S37Y) protein (lane 2) and corresponding wildtype protein (lane 1) were blotted with anti-CTNNB1 (S37Y) monoclonal antibody (Cat. #26296).

Immunofluorescence:

For research use only. Not for diagnostic or therapeutic applications.

Immunofluorescence of cells expressing CTNNB1 proteins with anti-CTNNB1 (S37Y) antibody. HEK293T cells were transfected with pCDNA3-GFP-CTNNB1 (WT) plasmid (left column) or pCDNA3-GFP-CTNNB1 (S37Y) plasmid (right column), then fixed and stained with anti-CTNNB1 (S37Y) monoclonal antibody (Cat. #26296).

For research use only. Not for diagnostic or therapeutic applications.
