FALCON® 70 MM CELL STRAINER, WHITE, STERILE, INDIVIDUALLY PACKAGED, 50/CASE

Falcon® 70 µm cell strainer is a sterile, easy-to-use device for rapidly isolating primary cells to consistently obtain a uniform single-cell suspension from tissues. Applications include stem cells and primary cells. Individually packaged, 50/case

•

- Strong nylon mesh with 70- micron pores for optimal performance in a variety of applications
- Evenly spaced mesh pores providing consistent and reliable results
- Conveniently accessible in individual packaging
- Extended lip on strainer enables aseptic handling with forceps
- Molded color-coded polypropylene frame with tab enables easy handling and identification
- Fits perfectly into 50 mL Falcon Conical Tube
- Disposable, easy-to-use, inexpensive, maintains sample integrity
- Sterilized by gamma irradiation, noncytotoxic

Product Number: Falcon™ 352350; Thermo Fisher 08-771-2

Mesh Material: Nylon

Disposable: Single-use

Color: White

For Use With (Application): Designed for rapidly isolating primary cells to consistently obtain a uniform single cell suspension from tissues

Includes: Extended lip on strainer, polypropylene frame with tab

Material: Polypropylene

Product Type: Cell Strainer

Sterility: Sterile

For Use With (Equipment): Conical Tubes, 50 mL Falcon

Mesh Size: 70 µm
