

B-ACTIN PAB

β-Actin Polyclonal Antibody

Cat. #: 21011

Gene Symbol: ACTB

Description: Anti-β-actin Rabbit Polyclonal Antibody

Background: Actin is expressed in all eukaryotic cells and is the major component of the cytoskeleton. At least six types of actin are present in mammalian tissues and fall into three classes. β-actin expression is limited to various types of muscle and it regulates contractile potentials for the muscle cells, whereas β and γ actins, also known as cytoplasmic actins, are predominantly expressed in nonmuscle cells, controlling cell structure and motility.

Immunogen: Synthetic peptide from the N-terminal of β-actin

Applications: ELISA, WB, IHC

Recommended Dilutions:

ELISA 1:1000–1:5000

WB 1:100–1:2000

IHC 1:50–1:100

Concentration: 0.2 mg/ml

Host Species: Rabbit

Format: Liquid

Clonality: Polyclonal

Purity: Purified from serum

Preservative: No

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 50% glycerol

Species Reactivity: Anti-β actin antibody recognizes β-actin of vertebrates and invertebrates

Storage Conditions: Store at -20°C. Avoid repeated freezing and thawing

Western blot:

HEK-293T

WB: anti- β -actin pAb

HEK-293T whole-cell lysate was used for western blot with Anti- β actin polyclonal antibody (cat # 21011).
