

ALBUMIN PAB**Albumin Polyclonal Antibody****Cat. #:** 21112**Gene Symbol:** Albumin**Description:** Anti-Albumin Rabbit Polyclonal Antibody**Background:** Serum albumin is the most abundant blood plasma protein in mammals. Albumin is essential for maintaining the osmotic pressure needed for proper distribution of body fluids between intravascular compartments and body tissues. It also acts as a plasma carrier by non-specifically binding several hydrophobic steroid hormones and as a transport protein for heme and fatty acids. Too much serum albumin in the body can be harmful.**Immunogen:** A synthetic peptide from the N-terminal region of human Albumin protein**Applications:** ELISA, WB, IHC, IP**Recommended Dilutions:**

ELISA: 1:100–1:5000

WB: 1:100–1:1000

IHC: 1:100–1:1000

Concentration: 0.2 mg/ml**Host Species:** Rabbit**Format:** Liquid**Clonality:** Polyclonal**Isotype:** IgG**Purity:** Purified from serum**Preservative:** No**Constituents:** PBS (without Mg^{2+} and Ca^{2+}), pH 7.4, 150 mM NaCl, 50% glycerol Species**Species Reactivity:** Albumin antibody recognizes Albumin proteins from mammals.**Storage Conditions:** Store at $-20^{\circ}C$. Avoid repeated freezing and thawing

Western blot:

WB: anti-Albumin pAb

HEK-293T (lane 1) and MEF (lane 2) whole-cell lysates were used for Western blot with anti-Albumin polyclonal antibody (cat # 21112).
