

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

AHNAK RABBIT PAB

Cat.#: S219211

Product Name: Anti-AHNAK Rabbit Polyclonal Antibody

Synonyms: PM227; AHNAKRS

UNIPROT ID: Q09666 (Gene Accession - BC012477)

Background: The protein encoded by this gene is a large (700 kDa) structural scaffold protein consisting of a central domain with 128 aa repeats. The encoded protein may play a role in such diverse processes as blood-brain barrier formation, cell structure and migration, cardiac calcium channel regulation, and tumor metastasis. A much shorter variant encoding a 17 kDa isoform exists for this gene, and the shorter isoform initiates a feedback loop that regulates alternative splicing of this gene.

Immunogen: Fusion protein of human AHNAK

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

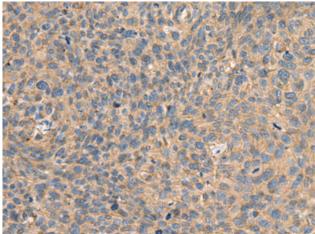

Research Areas: Signal Transduction, Cancer

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

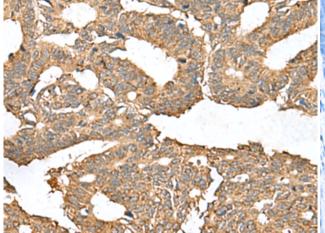

Product Description

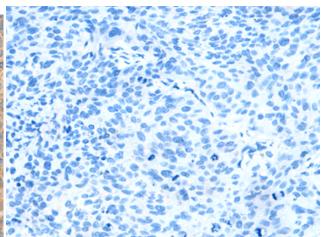

Pioneering GTPase and Oncogene Product Development since 2010

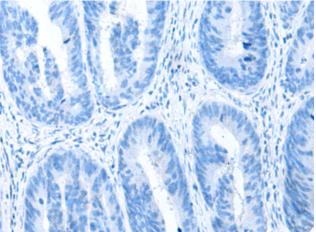

Immunohistochemistry analysis of paraffin embedded Human cervical cancer tissue using 219211(AHNAK Antibody) at a dilution of 1/50(Cytoplasm).

The image on the left is immunohistochemistry of paraffinembedded Human colorectal cancer tissue using 219211(Anti-AHNAK Antibody) at a dilution of 1/50.

In comparision with the IHC on the left, the same paraffin-embedded Human cervical cancer tissue is first treated with the fusion protein and then with 219211(Anti-AHNAK Antibody) at dilution 1/50.

In comparision with the IHC on the left, the same paraffin-embedded Human colorectal cancer tissue is first treated with fusion protein and then with D226062(Anti-AHNAK Antibody) at dilution 1/50.
