

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

ANNEXIN A1 RABBIT MAB

Cat.#: N261844

Product Name: Anti-Annexin Al Rabbit Monoclonal Antibody

Synonyms: ANXAI; ANXI; LPCI; Annexin AI; Annexin I; Annexin-1; Calpactin II; Calpactin-2; Chromobindin-9; Lipocortin I; Phospholipase A2 inhibitory

protein; p35

UNIPROT ID: P04083

Background: Plays important roles in the innate immune response as effector of glucocorticoid-mediated responses and regulator of the inflammatory process. Has anti-inflammatory activity (PubMed:8425544). Plays a role in glucocorticoid-mediated down-regulation of the early phase of the inflammatory response. Promotes resolution of inflammation and wound healing (PubMed:25664854). Functions at least in part by activating the formyl peptide receptors and downstream signaling cascades (PubMed:15187149, PubMed:25664854). Promotes chemotaxis of granulocytes and monocytes via activation of the formyl peptide receptors (PubMed:15187149). Contributes to the adaptive immune response by enhancing signaling cascades that are triggered by T-cell activation, regulates differentiation and proliferation of activated T-cells (PubMed:17008549). Promotes the differentiation of T-cells into Th1 cells and negatively regulates differentiation into Th2 cells (PubMed:17008549). Has no effect on unstimulated T cells (PubMed:17008549). Promotes rearrangement of the actin cytoskeleton, cell polarization and cell migration (PubMed:15187149). Negatively regulates hormone exocytosis via activation of the formyl peptide receptors and reorganization of the actin cytoskeleton (PubMed:19625660). Has high affinity for Ca2+ and can bind up to eight Ca2+ ions . Displays Ca2+-dependent binding to phospholipid membranes (PubMed:2532504, PubMed:8557678). Plays a role in the formation of phagocytic cups and phagosomes. Plays a role in phagocytosis by mediating the Ca2+-dependent interaction between phagosomes and the actin cytoskeleton.

Immunogen: Recombinant protein of human Annexin Al

Applications: WB,IHC-F,IHC-P,ICC/IF,IP

Recommended Dilutions: WB: 1/500-1/1000 IHC: 1/50-1/100 IF: 1/50-1/200 IP:

1/20

Host Species: Rabbit

Clonality: Rabbit Monoclonal

Clone ID: R08-5A8

MW: Calculated MW: 39 kDa; Observed MW: 39 kDa FOR RESEARCH USE ONLY. NOT FOR DIAGNOSTIC APPLICATIONS

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

Isotype: IgG

Purification: Affinity Purified

Species Reactivity: Human, Mouse, Rat

Conjugation: Unconjugated Modification: Unmodified

Constituents: PBS (without Mg2+ and Ca2+), pH 7.3 containing 50%

glycerol, 0.5% BSA and 0.02% sodium azide

Research Areas: Signal Transduction

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of using Annexin Al antibody. Highpressure and temperature Sodium Annexin Al antibody, and Citrate pH 6.0 was used for antigen retrieval.

paraffin-embedded Human tonsil Immunocytochemistry analysis of Annexin Al (green) in A549 using DAPI(blue).

Western blot analysis of Annexin Al in K562, C6, 3T3, Hela lysates using Annexin Al antibody.
