

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

ARSK RABBIT PAB

Cat.#: S217061

Product Name: Anti-ARSK Rabbit Polyclonal Antibody

Synonyms: TSULF

UNIPROT ID: Q6UWY0 (Gene Accession - BC130329)

Background: Sulfatases (EC 3.1.5.6), such as ARSK, hydrolyze sulfate esters from sulfated steroids,

carbohydrates, proteoglycans, and glycolipids. They are involved in hormone biosynthesis,

modulation of cell signaling, and degradation of macromolecules.

Immunogen: Fusion protein of human ARSK

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 1000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG **Purification:** Antigen affinity purification **Species Reactivity:** Human, Mouse, Rat

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40%

glycerol

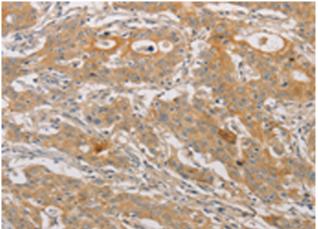

Research Areas: Cell Biology

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

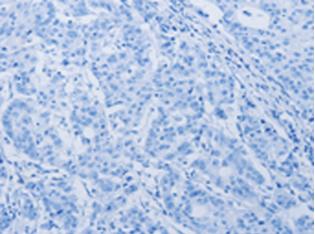

Product Description

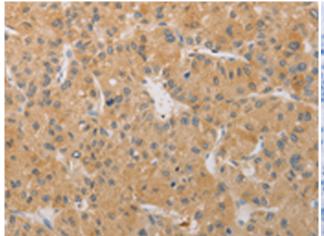

Pioneering GTPase and Oncogene Product Development since 2010

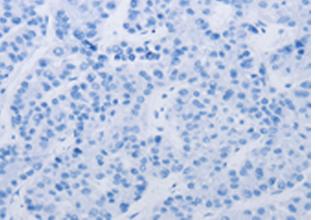

Immunohistochemistry analysis of paraffin embedded Human gasrtic cancer tissue using 217061 (ARSK Antibody) at a dilution of 1/30 (Cytoplasm).

In comparision with the IHC on the left, the same paraffin-embedded Human gasrtic cancer tissue is first treated with the fusion protein and then with 217061(Anti-ARSK Antibody) at dilution 1/30.

The image on the left is immunohistochemistry of paraffinembedded Human liver cancer tissue using 217061(Anti-ARSK Antibody) at a dilution of 1/30.

In comparision with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with fusion protein and then with D221727(Anti-ARSK Antibody) at dilution 1/30.
