

BICRA RABBIT PAB

Cat.#: S222085

Product Name: Anti-BICRA Rabbit Polyclonal Antibody

Synonyms: GLTSCR1

UNIPROT ID: Q9NZM4 (Gene Accession - NP_056526)

Background: May play a role in BRD4-mediated gene transcription.

Immunogen: Synthetic peptide of human BICRA

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-300; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Cancer, Cell Biology

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 222085(BICRA Antibody) at a dilution of 1/60(Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the synthetic peptide and then with 222085(Anti-BICRA Antibody) at dilution 1/60.
