

## **Product Description**

Pioneering GTPase and Oncogene Product Development since 2010

## **BLM RABBIT PAB**

Cat.#: S221617

**Product Name:** Anti-BLM Rabbit Polyclonal Antibody

Synonyms: BS; RECQ2; RECQL2; RECQL3

UNIPROT ID: P54132 (Gene Accession - NP\_000048)

**Background:** The Bloom syndrome gene product is related to the RecQ subset of DExH boxcontaining DNA helicases and has both DNA-stimulated ATPase and ATP-dependent DNA helicase activities. Mutations causing Bloom syndrome delete or alter helicase motifs and may disable the 3'-5' helicase activity. The normal protein may act to suppress inappropriate recombination.

Immunogen: Synthetic peptide of human BLM

**Applications:** ELISA, IHC

**Recommended Dilutions:** IHC: 25-100; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

**Isotype:** Immunogen-specific rabbit IgG **Purification:** Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40%

glycerol

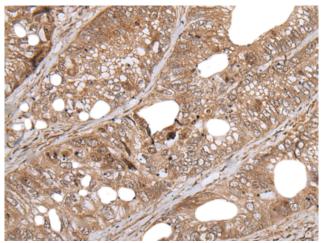

Research Areas: Epigenetics and Nuclear Signaling

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

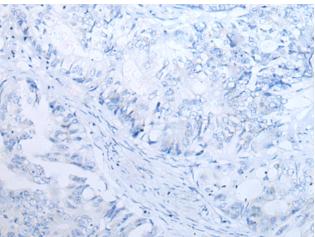

## **Product Description**

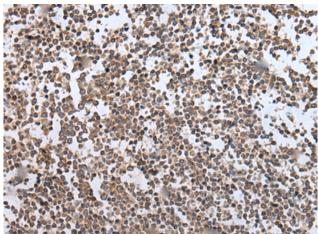

Pioneering GTPase and Oncogene Product Development since 2010

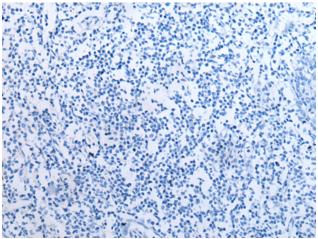

Immunohistochemistry analysis of paraffin embedded Human colorectal cancer tissue using 221617(BLM Antibody) at a dilution of 1/35(Nucleus).

In comparision with the IHC on the left, the same paraffin-embedded Human colorectal cancer tissue is first treated with the synthetic peptide and then with 221617(Anti-BLM Antibody) at dilution 1/35.

The image on the left is immunohistochemistry of paraffinembedded Human tonsil tissue using 221617(Anti-BLM Antibody) at a dilution of 1/35.

In comparision with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with synthetic peptide and then with D263279(Anti-BLM Antibody) at dilution 1/35.
