

CALML5 RABBIT PAB

Cat.#: S218426

Product Name: Anti-CALML5 Rabbit Polyclonal Antibody

Synonyms: CLSP

UNIPROT ID: Q9NZT1 (Gene Accession - BC039172)

Background: This gene encodes a novel calcium binding protein expressed in the epidermis and related to the calmodulin family of calcium binding proteins. Functional studies with recombinant protein demonstrate it does bind calcium and undergoes a conformational change when it does so. Abundant expression is detected only in reconstructed epidermis and is restricted to differentiating keratinocytes. In addition, it can associate with transglutaminase 3, shown to be a key enzyme in the terminal differentiation of keratinocytes.

Immunogen: Full length fusion protein

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-300; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Signal Transduction, Cancer

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 218426(CALML5 Antibody) at a dilution of 1/70(Cytoplasm and Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 218426(Anti-CALML5 Antibody) at dilution 1/70.

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using 218426(Anti-CALML5 Antibody) at a dilution of 1/70.

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with fusion protein and then with D224393(Anti-CALML5 Antibody) at dilution 1/70.
