CASPASE 6 RABBIT MAB

Cat.#: N263251

Product Name: Anti-Caspase 6 Rabbit Monoclonal Antibody **Synonyms:** CASP6; MCH2; Caspase-6; CASP-6; Apoptotic protease Mch-2 **UNIPROT ID:** P55212

Background: Caspase-6 (Mch2) is one of the major executioner caspases functioning in cellular apoptotic processes. Upon apoptotic stimulation, initiator caspases such as caspase-9 are cleaved and activated. The activated upstream caspases further process downstream executioner caspases, such as caspase-3 and caspase-6, by cleaving them into large and small subunits, thereby initiating a caspase cascade leading to apoptosis. One of the major targets for caspase-6 is the membrane associated protein lamin A.
