

## CCM2 RABBIT PAB

**Cat.#:** S212176

**Product Name:** Anti-CCM2 Rabbit Polyclonal Antibody

**Synonyms:** OSM; C7orf22; PP10187

**UNIPROT ID:** Q9BSQ5 (Gene Accession - BC004903 )

**Background:** This gene encodes a scaffold protein that functions in the stress-activated p38 Mitogen-activated protein kinase (MAPK) signaling cascade. The protein interacts with SMAD specific E3 ubiquitin protein ligase 1 (also known as SMURF1) via a phosphotyrosine binding domain to promote RhoA degradation. The protein is required for normal cytoskeletal structure, cell-cell interactions, and lumen formation in endothelial cells. Mutations in this gene result in cerebral cavernous malformations. Multiple transcript variants encoding different isoforms have been found for this gene.

**Immunogen:** Fusion protein of human CCM2

**Applications:** ELISA, IHC

**Recommended Dilutions:** IHC: 20-100; ELISA: 2000-5000

**Host Species:** Rabbit

**Clonality:** Rabbit Polyclonal

**Isotype:** Immunogen-specific rabbit IgG

**Purification:** Antigen affinity purification

**Species Reactivity:** Human

**Constituents:** PBS (without Mg<sup>2+</sup> and Ca<sup>2+</sup>), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

**Research Areas:** Signal Transduction, Neuroscience

**Storage & Shipping:** Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 212176 (CCM2 Antibody) at a dilution of 1/30 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 212176 (Anti-CCM2 Antibody) at dilution 1/30.
