

CENPC RABBIT PAB

Cat.#: S217279

Product Name: Anti-CENPC Rabbit Polyclonal Antibody

Synonyms: MIF2; hcp-4; CENP-C; CENPC1

UNIPROT ID: Q03188 (Gene Accession - BC030695)

Background: Centromere protein C 1 is a centromere autoantigen and a component of the inner kinetochore plate. The protein is required for maintaining proper kinetochore size and a timely transition to anaphase. A putative pseudogene exists on chromosome 12. Component of the CENPA-NAC (nucleosome-associated) complex, a complex that plays a central role in assembly of kinetochore proteins, mitotic progression and chromosome segregation. The CENPA-NAC complex recruits the CENPA-CAD (nucleosome distal) complex and may be involved in incorporation of newly synthesized CENPA into centromeres.

Immunogen: Fusion protein of human CENPC

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 2000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Epigenetics and Nuclear Signaling

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human prostate cancer tissue using 217279(CENPC Antibody) at a dilution of 1/70(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human prostate cancer tissue is first treated with the fusion protein and then with 217279(Anti-CENPC Antibody) at dilution 1/70.

The image on the left is immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using 217279(Anti-CENPC Antibody) at a dilution of 1/70.

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with fusion protein and then with D222100(Anti-CENPC Antibody) at dilution 1/70.
