

CENPM RABBIT PAB

Cat.#: S217278

Product Name: Anti-CENPM Rabbit Polyclonal Antibody

Synonyms: PANE1; CENP-M; C22orf18; bK250D10.2

UNIPROT ID: Q9NSP4 (Gene Accession - BC000705)

Background: The centromere is a specialized chromatin domain, present throughout the cell cycle, that acts as a platform on which the transient assembly of the kinetochore occurs during mitosis. All active centromeres are characterized by the presence of long arrays of nucleosomes in which CENPA (MIM 117139) replaces histone H3 (see MIM 601128). CENPM is an additional factor required for centromere assembly (Foltz et al., 2006 [PubMed 16622419]).

Immunogen: Full length fusion protein

Applications: ELISA, IHC

Recommended Dilutions: IHC: Oct-50; ELISA: 1000-2000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Epigenetics and Nuclear Signaling

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 217278 (CENPM Antibody) at a dilution of 1/20 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 217278 (Anti-CENPM Antibody) at dilution 1/20.

The image on the left is immunohistochemistry of paraffin-embedded Human breast cancer tissue using 217278 (Anti-CENPM Antibody) at a dilution of 1/20.

In comparison with the IHC on the left, the same paraffin-embedded Human breast cancer tissue is first treated with fusion protein and then with D222098 (Anti-CENPM Antibody) at dilution 1/20.
