

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

CKAP2 RABBIT PAB

Cat.#: S217289

Product Name: Anti-CKAP2 Rabbit Polyclonal Antibody

Synonyms: LB1; TMAP; se20-10

UNIPROT ID: Q8WWK9 (Gene Accession - BC010901)

Background: This gene encodes a cytoskeleton-associated protein that stabalizes microtubules and plays a role in the regulation of cell division. The encoded protein is itself regulated through phosphorylation at multiple serine and threonine residues. There is a pseudogene of this gene on chromosome 14. Alternative splicing results in multiple transcript variations.

Immunogen: Fusion protein of human CKAP2

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 2000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG **Purification:** Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40%

glycerol

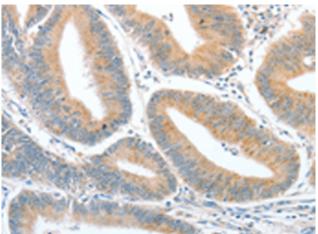

Research Areas: Cancer

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

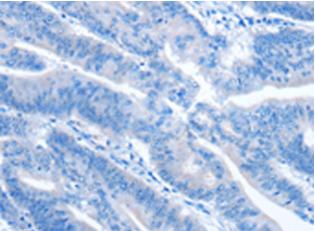

Product Description

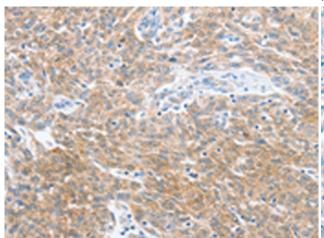

Pioneering GTPase and Oncogene Product Development since 2010

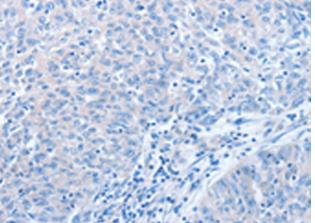

Immunohistochemistry analysis of paraffin embedded Human colon cancer tissue using 217289(CKAP2 Antibody) at a dilution of 1/50(Cytoplasm).

In comparision with the IHC on the left, the same paraffin-embedded Human colon cancer tissue is first treated with the fusion protein and then with 217289(Anti-CKAP2 Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffinembedded Human ovarian cancer tissue using 217289(Anti-CKAP2 Antibody) at a dilution of 1/50.

In comparision with the IHC on the left, the same paraffin-embedded Human ovarian cancer tissue is first treated with fusion protein and then with D222118(Anti-CKAP2 Antibody) at dilution 1/50.
