

COMP RABBIT PAB

Cat.#: S217298

Product Name: Anti-COMP Rabbit Polyclonal Antibody

Synonyms: MED; EDM1; EPD1; PSACH; THBS5

UNIPROT ID: P49747 (Gene Accession - BC125092)

Background: The protein encoded by this gene is a noncollagenous extracellular matrix (ECM) protein. It consists of five identical glycoprotein subunits, each with EGF-like and calcium-binding (thrombospondin-like) domains. Oligomerization results from formation of a five-stranded coiled coil and disulfides. Binding to other ECM proteins such as collagen appears to depend on divalent cations. Mutations can cause the osteochondrodysplasias pseudochondroplasia (PSACH) and multiple epiphyseal dysplasia (MED).

Immunogen: Fusion protein of human COMP

Applications: ELISA, IHC

Recommended Dilutions: IHC: 100-300; ELISA: 2000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Signal Transduction, Cancer, Stem Cells

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human thyroid cancer tissue using 217298 (COMP Antibody) at a dilution of 1/50 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with the fusion protein and then with 217298 (Anti-COMP Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffin-embedded Human breast cancer tissue using 217298 (Anti-COMP Antibody) at a dilution of 1/50.

In comparison with the IHC on the left, the same paraffin-embedded Human breast cancer tissue is first treated with fusion protein and then with D222134 (Anti-COMP Antibody) at dilution 1/50.
