

CPVL RABBIT PAB

Cat.#: S218553

Product Name: Anti-CPVL Rabbit Polyclonal Antibody

Synonyms: HVLP

UNIPROT ID: Q9H3G5 (Gene Accession - BC016838)

Background: The protein encoded by this gene is a carboxypeptidase and bears strong sequence similarity to serine carboxypeptidases. Carboxypeptidases are a large class of proteases that act to cleave a single amino acid from the carboxy termini of proteins or peptides. The exact function of this protein, however, has not been determined. At least two alternatively spliced transcripts which encode the same protein have been observed.

Immunogen: Fusion protein of human CPVL

Applications: ELISA, IHC

Recommended Dilutions: IHC: 20-100; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

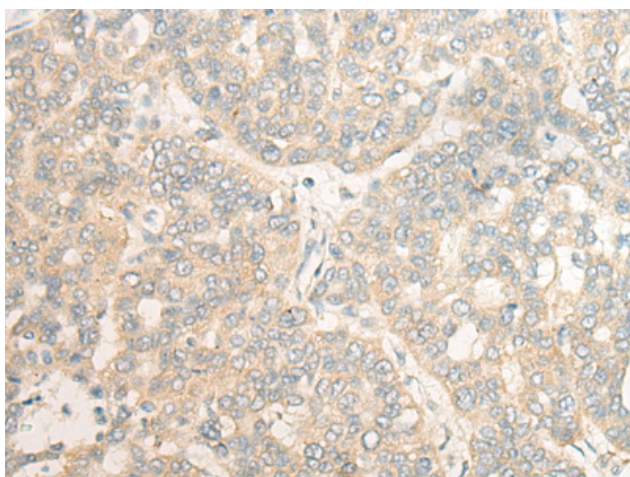

Purification: Antigen affinity purification

Species Reactivity: Human

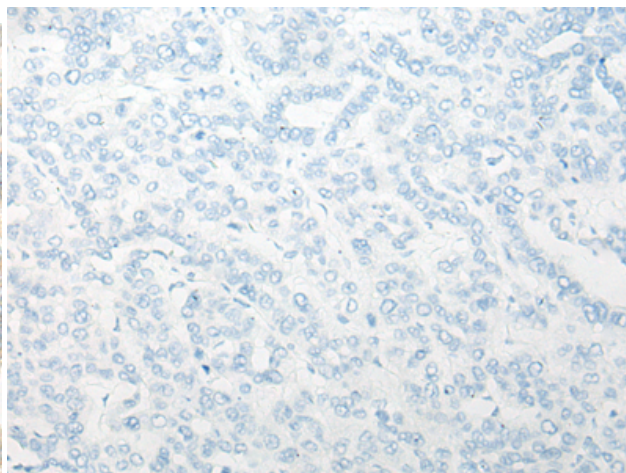

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Cell Biology

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 218553 (CPVL Antibody) at a dilution of 1/20 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the fusion protein and then with 218553 (Anti-CPVL Antibody) at dilution 1/20.
