

## **Product Description**

Pioneering GTPase and Oncogene Product Development since 2010

## **CREBBP RABBIT PAB**

Cat.#: S222273

**Product Name:** Anti-CREBBP Rabbit Polyclonal Antibody

**Synonyms:** CBP; RSTS; KAT3A; RSTS1

UNIPROT ID: Q92793 (Gene Accession - NP\_004371)

**Background:** This gene is ubiquitously expressed and is involved in the transcriptional coactivation of many different transcription factors. First isolated as a nuclear protein that binds to cAMP-response element binding protein (CREB), this gene is now known to play critical roles in embryonic development, growth control, and homeostasis by coupling chromatin remodeling to transcription factor recognition. The protein encoded by this gene has intrinsic histone acetyltransferase activity and also acts as a scaffold to stabilize additional protein interactions with the transcription complex. This protein acetylates both histone and non-histone proteins. This protein shares regions of very high sequence similarity with protein p300 in its bromodomain, cysteine-histidine-rich regions, and histone acetyltransferase domain. Mutations in this gene cause Rubinstein-Taybi syndrome (RTS). Chromosomal translocations involving this gene have been associated with acute myeloid leukemia. Alternative splicing results in multiple transcript variants encoding different isoforms.

Immunogen: Synthetic peptide of human CREBBP

Applications: ELISA, IHC

**Recommended Dilutions:** IHC: 30-150; ELISA: 5000-10000

**Host Species:** Rabbit

**Clonality:** Rabbit Polyclonal

**Isotype:** Immunogen-specific rabbit IgG **Purification:** Antigen affinity purification **Species Reactivity:** Human, Mouse, Rat

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40%

glycerol

Research Areas: Epigenetics and Nuclear Signaling, Cancer, Metabolism, Cardiovascular, Signal

Transduction

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

## **Product Description**

Pioneering GTPase and Oncogene Product Development since 2010

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 222273(CREBBP Antibody) at a dilution of 1/35(Nucleus or Cytoplasm).

In comparision with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the synthetic peptide and then with 222273(Anti-CREBBP . Antibody) at dilution 1/35.

The image on the left is immunohistochemistry of paraffinembedded Human tonsil tissue using 1/35.

In comparision with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with synthetic peptide 222273(Anti-CREBBP Antibody) at a dilution of and then with D264315(Anti-CREBBP Antibody) at dilution 1/35.
