

## **Product Description**

Pioneering GTPase and Oncogene Product Development since 2010

## **DNPEP RABBIT PAB**

Cat.#: S218886

Product Name: Anti-DNPEP Rabbit Polyclonal Antibody

**Synonyms:** DAP; ASPEP

UNIPROT ID: Q9ULA0 (Gene Accession - BC000653)

**Background:** The protein encoded by this gene is an aminopeptidase which prefers acidic amino acids, and specifically favors aspartic acid over glutamic acid. It is thought to be a cytosolic protein involved in general metabolism of intracellular proteins. Several transcript variants encoding different isoforms have been found for this gene.

Immunogen: Fusion protein of human DNPEP

Applications: ELISA, IHC

Recommended Dilutions: IHC: 25-100; ELISA: 5000-10000

Host Species: Rabbit

**Clonality:** Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

**Purification:** Antigen affinity purification

Species Reactivity: Human, Mouse

**Constituents:** PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

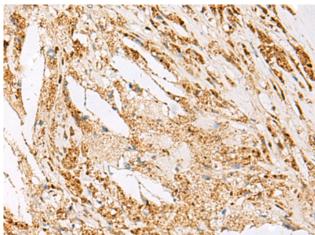

Research Areas: Metabolism

**Storage & Shipping:** Store at -20°C. Avoid repeated freezing and thawing

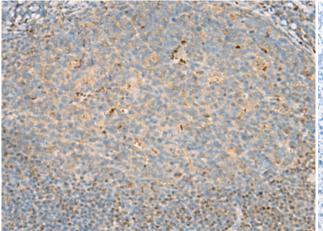

## **Product Description**

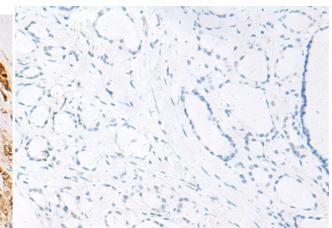

Pioneering GTPase and Oncogene Product Development since 2010

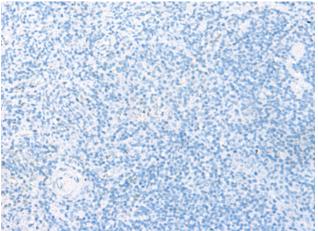

Immunohistochemistry analysis of paraffin embedded Human thyroid cancer tissue using 218886(DNPEP Antibody) at a dilution of 1/60(Nucleus and Cytoplasm).

The image on the left is immunohistochemistry of paraffinembedded Human tonsil tissue using 218886(Anti-DNPEP Antibody) at a dilution of 1/60.

In comparision with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with the fusion protein and then with 218886(Anti-DNPEP Antibody) at dilution 1/60.

In comparision with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with fusion protein and then with D225440(Anti-DNPEP Antibody) at dilution 1/60.
