

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

DUSP9 RABBIT PAB

Cat.#: S215005

Product Name: Anti-DUSP9 Rabbit Polyclonal Antibody

Synonyms: MKP4; MKP-4

UNIPROT ID: Q99956 (Gene Accession - NP_001386)

Background: The protein encoded by this gene is a member of the dual specificity protein phosphatase subfamily. These phosphatases inactivate their target kinases by dephosphorylating both the phosphoserine/threonine and phosphotyrosine residues. They negatively regulate members of the mitogen-activated protein (MAP) kinase superfamily (MAPK/ERK, SAPK/JNK, p38), which is associated with cellular proliferation and differentiation. Different members of the family of dual specificity phosphatases show distinct substrate specificities for various MAP kinases, different tissue distribution and subcellular localization, and different modes of inducibility of their expression by extracellular stimuli. This gene product shows selectivity for members of the ERK family of MAP kinases, is expressed only in placenta, kidney, and fetal liver, and is localized to the cytoplasm and nucleus.

Immunogen: Synthetic peptide of human DUSP9

Applications: ELISA, IHC

Recommended Dilutions: IHC: Oct-50; ELISA: 1000-2000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

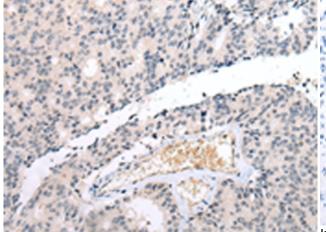

Research Areas: Signal Transduction

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

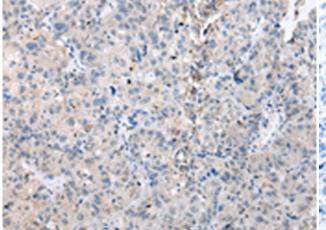

Product Description

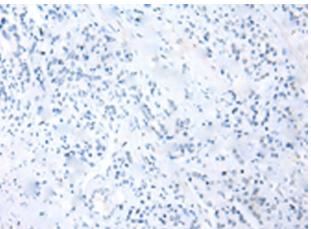

Pioneering GTPase and Oncogene Product Development since 2010

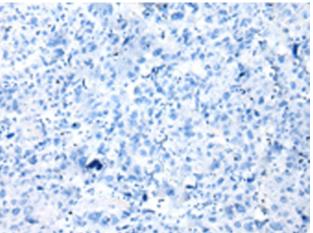

Immunohistochemistry analysis of paraffin embedded Human prostate cancer tissue using 215005(DUSP9 Antibody) at a dilution of 1/20(Cytoplasm).

The image on the left is immunohistochemistry of paraffinembedded Human ovarian cancer tissue using 215005(Anti-DUSP9 Antibody) at a dilution of 1/20.

In comparision with the IHC on the left, the same paraffin-embedded Human prostate cancer tissue is first treated with the synthetic peptide and then with 215005(Anti-DUSP9 Antibody) at dilution 1/20.

In comparision with the IHC on the left, the same paraffin-embedded Human ovarian cancer tissue is first treated with synthetic peptide and then with D162746(Anti-DUSP9 Antibody) at dilution 1/20.
