

EIF2D RABBIT PAB

Cat.#: S221936

Product Name: Anti-EIF2D Rabbit Polyclonal Antibody

Synonyms: LGTN; HCA56

UNIPROT ID: P41214 (Gene Accession - NP_008824)

Background: This gene encodes a translation initiation factor involved in the recruitment and delivery of aminoacyl-tRNAs to the P-site of the eukaryotic ribosome in a GTP-independent manner. This gene was previously referred to as ligatin, but is now known to localize to the cytoplasm and localize and function with translation factors. Multiple transcript variants encoding different isoforms have been found for this gene.

Immunogen: Synthetic peptide of human EIF2D

Applications: ELISA, IHC

Recommended Dilutions: IHC: 25-100; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Signal Transduction

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human thyroid cancer tissue using 221936(EIF2D Antibody) at a dilution of 1/25(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with the synthetic peptide and then with 221936(Anti-EIF2D Antibody) at dilution 1/25.

The image on the left is immunohistochemistry of paraffin-embedded Human ovarian cancer tissue using 221936(Anti-EIF2D Antibody) at a dilution of 1/25.

In comparison with the IHC on the left, the same paraffin-embedded Human ovarian cancer tissue is first treated with synthetic peptide and then with D263767(Anti-EIF2D Antibody) at dilution 1/25.
