

ELF5 RABBIT PAB

Cat.#: S219294

Product Name: Anti-ELF5 Rabbit Polyclonal Antibody

Synonyms: ESE2

UNIPROT ID: Q9UKW6 (Gene Accession - BC029743)

Background: The protein encoded by this gene is a member of an epithelium-specific subclass of the Ets transcription factor family. In addition to its role in regulating the later stages of terminal differentiation of keratinocytes, it appears to regulate a number of epithelium-specific genes found in tissues containing glandular epithelium such as salivary gland and prostate. It has very low affinity to DNA due to its negative regulatory domain at the amino terminus. Several alternatively spliced transcript variants encoding different isoforms have been described for this gene.
