

ENSA RABBIT PAB

Cat.#: S218947

Product Name: Anti-ENSA Rabbit Polyclonal Antibody

Synonyms: ARPP-19e

UNIPROT ID: O43768 (Gene Accession - BC000436)

Background: The protein encoded by this gene belongs to a highly conserved cAMP-regulated phosphoprotein (ARPP) family. This protein was identified as an endogenous ligand for the sulfonylurea receptor, ABCC8/SUR1. ABCC8 is the regulatory subunit of the ATP-sensitive potassium (KATP) channel, which is located on the plasma membrane of pancreatic beta cells and plays a key role in the control of insulin release from pancreatic beta cells. This protein is thought to be an endogenous regulator of KATP channels. In vitro studies have demonstrated that this protein modulates insulin secretion through the interaction with KATP channel, and this gene has been proposed as a candidate gene for type 2 diabetes. At least eight alternatively spliced transcript variants encoding distinct isoforms have been observed.

Immunogen: Fusion protein of human ENSA

Applications: ELISA, IHC

Recommended Dilutions: IHC: 40–200; ELISA: 5000–10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Neuroscience

Storage & Shipping: Store at –20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 218947(ENSA Antibody) at a dilution of 1/40(Nucleus or Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 218947(Anti-ENSA Antibody) at dilution 1/40.

The image on the left is immunohistochemistry of paraffin-embedded Human tonsil tissue using 218947(Anti-ENSA Antibody) at a dilution of 1/40.

In comparison with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with fusion protein and then with D225555(Anti-ENSA Antibody) at dilution 1/40.
