

## FLG RABBIT PAB

**Cat.#:** S213516

**Product Name:** Anti-FLG Rabbit Polyclonal Antibody

**Synonyms:** ATOD2

**UNIPROT ID:** P20930 (Gene Accession - NP\_002007 )

**Background:** The protein encoded by this gene is an intermediate filament-associated protein that aggregates keratin intermediate filaments in mammalian epidermis. It is initially synthesized as a polyprotein precursor, profilaggrin (consisting of multiple filaggrin units of 324 aa each), which is localized in keratohyalin granules, and is subsequently proteolytically processed into individual functional filaggrin molecules. Mutations in this gene are associated with ichthyosis vulgaris.

**Immunogen:** Synthetic peptide of human FLG

**Applications:** ELISA, IHC

**Recommended Dilutions:** IHC: 25-100; ELISA: 1000-5000

**Host Species:** Rabbit

**Clonality:** Rabbit Polyclonal

**Isotype:** Immunogen-specific rabbit IgG

**Purification:** Antigen affinity purification

**Species Reactivity:** Human

**Constituents:** PBS (without Mg<sup>2+</sup> and Ca<sup>2+</sup>), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

**Research Areas:** Signal Transduction, Immunology

**Storage & Shipping:** Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin-embedded Human cervical cancer tissue using 213516(FLG Antibody) at a dilution of 1/30(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human cervical cancer tissue is first treated with the synthetic peptide and then with 213516(Anti-FLG Antibody) at dilution 1/30.

The image on the left is immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using 213516(Anti-FLG Antibody) at a dilution of 1/30.

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with synthetic peptide and then with D160334(Anti-FLG Antibody) at dilution 1/30.
