

FSHR RABBIT PAB

Cat.#: S216516

Product Name: Anti-FSHR Rabbit Polyclonal Antibody

Synonyms: LGR1, ODGI, FSHRO

UNIPROT ID: P23945 (Gene Accession - BC118548)

Background: The protein encoded by this gene belongs to family 1 of G-protein coupled receptors. It is the receptor for follicle stimulating hormone and functions in gonad development. Mutations in this gene cause ovarian dysgenesis type 1, and also ovarian hyperstimulation syndrome. Alternative splicing results in multiple transcript variants.

Immunogen: Fusion protein of human FSHR

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 2000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Signal Transduction, Neuroscience

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human breast cancer tissue using 216516(FSHR Antibody) at a dilution of 1/70(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human breast cancer tissue is first treated with the fusion protein and then with 216516(Anti-FSHR Antibody) at dilution 1/70.

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using 216516(Anti-FSHR Antibody) at a dilution of 1/70.

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with fusion protein and then with D220641(Anti-FSHR Antibody) at dilution 1/70.
