

GCKR RABBIT PAB

Cat.#: S217472

Product Name: Anti-GCKR Rabbit Polyclonal Antibody

Synonyms: GKRP; FGQTL5

UNIPROT ID: Q14397 (Gene Accession - BC130481)

Background: This gene encodes a protein belonging to the GCKR subfamily of the SIS (Sugar ISomerase) family of proteins. The gene product is a regulatory protein that inhibits glucokinase in liver and pancreatic islet cells by binding non-covalently to form an inactive complex with the enzyme. This gene is considered a susceptibility gene candidate for a form of maturity-onset diabetes of the young (MODY).

Immunogen: Fusion protein of human GCKR

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 2000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Metabolism, Cancer, Cardiovascular

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human ovarian cancer tissue using 217472(GCKR Antibody) at a dilution of 1/40(Cytoplasm or Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human ovarian cancer tissue is first treated with the fusion protein and then with 217472(Anti-GCKR Antibody) at dilution 1/40.

The image on the left is immunohistochemistry of paraffin-embedded Human breast cancer tissue using 217472(Anti-GCKR Antibody) at a dilution of 1/40.

In comparison with the IHC on the left, the same paraffin-embedded Human breast cancer tissue is first treated with fusion protein and then with D222411(Anti-GCKR Antibody) at dilution 1/40.
