

GLMN RABBIT PAB

Cat.#: S220575

Product Name: Anti-GLMN Rabbit Polyclonal Antibody

Synonyms: FAP; GVM; GLML; FAP48; FAP68; FKBPAP; VMGLOM

UNIPROT ID: Q92990 (Gene Accession - NP_444504)

Background: This gene encodes a phosphorylated protein that is a member of a Skp1-Cullin-F-box-like complex. The protein is essential for normal development of the vasculature and mutations in this gene have been associated with glomuvenous malformations, also called glomangiomas. Alternatively spliced variants that encode different protein isoforms have been described but the full-length nature of only one has been determined.

Immunogen: Synthetic peptide of human GLMN

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 2000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Cardiovascular, Stem Cells

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human thyroid cancer tissue using 220575 (GLMN Antibody) at a dilution of 1/40 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with the synthetic peptide and then with 220575 (Anti-GLMN Antibody) at dilution 1/40.

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using 220575 (Anti-GLMN Antibody) at a dilution of 1/40.

In comparison with the IHC on the left, the same paraffin-embedded Human brain tissue is first treated with synthetic peptide and then with D261713 (Anti-GLMN Antibody) at dilution 1/40.
