

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

GRASP RABBIT PAB

Cat.#: S222076

Product Name: Anti-GRASP Rabbit Polyclonal Antibody

Synonyms: TAMALIN

UNIPROT ID: Q7Z6J2 (Gene Accession - NP_859062)

Background: This gene encodes a protein that functions as a molecular scaffold, linking receptors, including group 1 metabotropic glutamate receptors, to neuronal proteins. The encoded protein contains conserved domains, including a leucine zipper sequence, PDZ domain and a C-terminal PDZ-binding motif. Alternately spliced transcript variants have been observed for this gene.

Immunogen: Synthetic peptide of human GRASP

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-300; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Signal Transduction, Neuroscience

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

Immunohistochemistry analysis of paraffin embedded Human lung cancer tissue using 222076(GRASP Antibody) at a dilution of 1/60(Cytoplasm and Nucleus).

In comparision with the IHC on the left, the same paraffin-embedded Human lung cancer tissue is first treated with the synthetic peptide and then with 222076(Anti-GRASP Antibody) at dilution 1/60.

The image on the left is immunohistochemistry of paraffinembedded Human thyroid cancer tissue using 222076(Anti-GRASP Antibody) at a dilution of 1/60.

In comparision with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with synthetic peptide and then with D263982(Anti-GRASP Antibody) at dilution 1/60.
