

## **Product Description**

Pioneering GTPase and Oncogene Product Development since 2010

## **GRM3 RABBIT PAB**

**Cat.#:** S216542

**Product Name:** Anti-GRM3 Rabbit Polyclonal Antibody

**Synonyms:** GLUR3; mGlu3; GPRC1C; MGLUR3

UNIPROT ID: Q14832 (Gene Accession - BC041407)

**Background:** L-glutamate is the major excitatory neurotransmitter in the central nervous system

and activates both ionotropic and metabotropic glutamate receptors. Glutamatergic

neurotransmission is involved in most aspects of normal brain function and can be perturbed in many neuropathologic conditions. The metabotropic glutamate receptors are a family of G protein-coupled receptors, that have been divided into 3 groups on the basis of sequence homology, putative signal transduction mechanisms, and pharmacologic properties. Group I includes GRM1 and GRM5 and these receptors have been shown to activate phospholipase C. Group II includes GRM2 and GRM3 while Group III includes GRM4, GRM6, GRM7 and GRM8. Group II and III receptors are linked to the inhibition of the cyclic AMP cascade but differ in their agonist selectivities.

**Immunogen:** Fusion protein of human GRM3

**Applications:** ELISA, IHC

**Recommended Dilutions:** IHC: 50-200; ELISA: 2000-5000

Host Species: Rabbit

**Clonality:** Rabbit Polyclonal

**Isotype:** Immunogen-specific rabbit IgG **Purification:** Antigen affinity purification **Species Reactivity:** Human, Mouse, Rat

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40%

glycerol

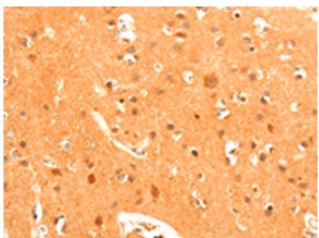

Research Areas: Signal Transduction, Neuroscience

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

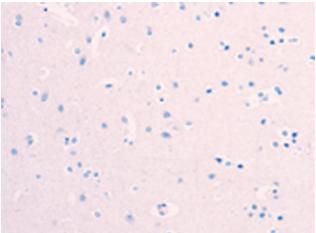

## **Product Description**

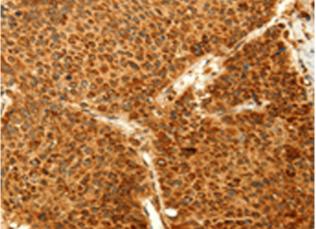

Pioneering GTPase and Oncogene Product Development since 2010

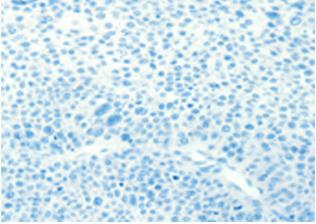

Immunohistochemistry analysis of paraffin embedded Human brain tissue using 216542(GRM3 Antibody) at a dilution of 1/50(Cytoplasm, Cell membrane).

In comparision with the IHC on the left, the same paraffin-embedded Human brain tissue is first treated with the fusion protein and then with 216542(Anti-GRM3 Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffinembedded Human liver cancer tissue using 216542(Anti-GRM3 Antibody) at a dilution of 1/50.

In comparision with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with fusion protein and then with D220717(Anti-GRM3 Antibody) at dilution 1/50.
