

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

GRN RABBIT PAB

Cat.#: S216726

Product Name: Anti-GRN Rabbit Polyclonal Antibody **Synonyms:** GEP; GP88; PEPI; PGRN; CLN11; PCDGF **UNIPROT ID:** P28799 (Gene Accession - BC000324)

Background: Granulins are a family of secreted, glycosylated peptides that are cleaved from a single precursor protein with 7.5 repeats of a highly conserved 12-cysteine granulin/epithelin motif. The 88 kDa precursor protein, progranulin, is also called proepithelin and PC cell-derived growth factor. Cleavage of the signal peptide produces mature granulin which can be further cleaved into a variety of active, 6 kDa peptides. These smaller cleavage products are named granulin A, granulin B, granulin C, etc. Epithelins 1 and 2 are synonymous with granulins A and B, respectively. Both the peptides and intact granulin protein regulate cell growth. However, different members of the granulin protein family may act as inhibitors, stimulators, or have dual actions on cell growth. Granulin family members are important in normal development, wound healing, and tumorigenesis.

Immunogen: Fusion protein of human GRN

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG **Purification:** Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40%

glycerol

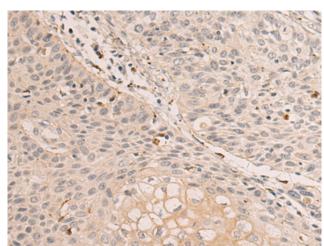

Research Areas: Neuroscience, Immunology

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

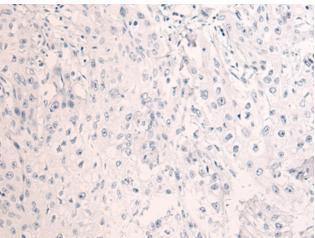

Product Description

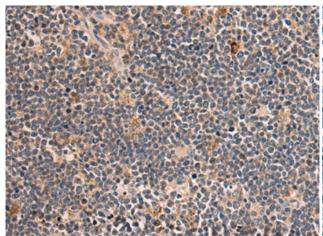

Pioneering GTPase and Oncogene Product Development since 2010

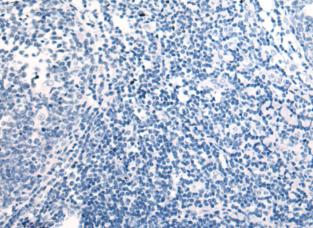

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 216726(GRN Antibody) at a dilution of 1/90(Secreted).

In comparision with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 216726(Anti-GRN Antibody) at dilution 1/90.

The image on the left is immunohistochemistry of paraffinembedded Human tonsil tissue using 216726(Anti-GRN Antibody) at a dilution of 1/90.

In comparision with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with fusion protein and then with D221130(Anti-GRN Antibody) at dilution 1/90.
