

## **Product Description**

Pioneering GTPase and Oncogene Product Development since 2010

## **HISTONE H1.0 RABBIT MAB**

Cat.#: N262326

**Product Name:** Anti-Histone H1.0 Rabbit Monoclonal Antibody **Synonyms:** Histone H1.0; Histone H1(0); Histone H1.0; N-terminally processed; H1F0; H1FV; Histone H5 **UNIPROT ID:** P07305

**Background:** Histone H1.0 is a lysine rich member of the H1 family of linker histones. The H1 family of proteins interacts with linker DNA between nucleosomes and mediates compaction into higher order chromatin. Histones H1 are necessary for the condensation of nucleosome chains into higher-order structures. The H1F0 histones are found in cells that are in terminal stages of differentiation or that have low rates of cell division.

**Immunogen:** A synthetic peptide of human Histone H1.0 Applications: WB,IHC-P **Recommended Dilutions:** WB: 1/500-1/1000 IHC: 1/50-1/100 Host Species: Rabbit Clonality: Rabbit Monoclonal **Clone ID:** R07-0E8 MW: Calculated MW: 21 kDa; Observed MW: 30 kDa Isotype: IgG Purification: Affinity Purified Species Reactivity: Human, Rat, Hamster Conjugation: Unconjugated Modification: Unmodified **Constituents:** PBS (without Mg2+ and Ca2+), pH 7.3 containing 50% glycerol, 0.5% BSA and 0.02% sodium azide Research Areas: Epigenetics and Nuclear Signaling Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing
