

IPO8 RABBIT PAB

Cat.#: S220635

Product Name: Anti-IPO8 Rabbit Polyclonal Antibody

Synonyms: RANBP8

UNIPROT ID: O15397 (Gene Accession - NP_006381)

Background: The importin-alpha/beta complex and the GTPase Ran mediate nuclear import of proteins with a classical nuclear localization signal. The protein encoded by this gene is a member of a class of approximately 20 potential Ran targets that share a sequence motif related to the Ran-binding site of importin-beta. This protein binds to the nuclear pore complex and, along with RanGTP and RANBP1, inhibits the GAP stimulation of the Ran GTPase. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
