

## JUNCTIONAL ADHESION MOLECULE 1 RABBIT MAB

**Cat.#:** N262435

**Product Name:** Anti-Junctional Adhesion Molecule 1 Rabbit Monoclonal Antibody

**Synonyms:** F11R; JAM1; JCAM; Junctional adhesion molecule A; JAM-A; Junctional adhesion molecule 1; JAM-1; Platelet F11 receptor; Platelet adhesion molecule 1; PAM-1; CD321

**UNIPROT ID:** Q9Y624

**Background:** Seems to play a role in epithelial tight junction formation. Appears early in primordial forms of cell junctions and recruits PARD3. The association of the PARD6-PARD3 complex may prevent the interaction of PARD3 with JAM1, thereby preventing tight junction assembly (By similarity). Plays a role in regulating monocyte transmigration involved in integrity of epithelial barrier. Involved in platelet activation. In case of orthoreovirus infection, serves as receptor for the virus.
