

KPNA1 RABBIT PAB

Cat.#: S219533

Product Name: Anti-KPNA1 Rabbit Polyclonal Antibody

Synonyms: RCH2; SRP1; IPOA5; NPI-1

UNIPROT ID: P52294 (Gene Accession - BC002374)

Background: The transport of molecules between the nucleus and the cytoplasm in eukaryotic cells is mediated by the nuclear pore complex (NPC), which consists of 60–100 proteins. Small molecules (up to 70 kD) can pass through the nuclear pore by nonselective diffusion while larger molecules are transported by an active process. The protein encoded by this gene belongs to the importin alpha family, and is involved in nuclear protein import. This protein interacts with the recombination activating gene 1 (RAG1) protein and is a putative substrate of the RAG1 ubiquitin ligase. Alternative splicing results in multiple transcript variants.

Immunogen: Fusion protein of human KPNA1

Applications: ELISA, IHC

Recommended Dilutions: IHC: 100–300; ELISA: 5000–10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Immunology, Signal Transduction

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human colorectal cancer tissue using 219533(KPNA1 Antibody) at a dilution of 1/50(Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human colorectal cancer tissue is first treated with the fusion protein and then with 219533(Anti-KPNA1 Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffin-embedded Human gastric cancer tissue using 219533(Anti-KPNA1 Antibody) at a dilution of 1/50.

In comparison with the IHC on the left, the same paraffin-embedded Human gastric cancer tissue is first treated with fusion protein and then with D227547(Anti-KPNA1 Antibody) at dilution 1/50.
