

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

LIMS1 RABBIT PAB

Cat.#: S217576

Product Name: Anti-LIMS1 Rabbit Polyclonal Antibody

Synonyms: PINCH; PINCH-1

UNIPROT ID: P48059 (Gene Accession - NP_004978)

Background: The protein encoded by this gene is an adaptor protein which contains five LIM domains, or double zinc fingers. The protein is likely involved in integrin signaling through its LIM domain-mediated interaction with integrin-linked kinase, found in focal adhesion plaques. It is also thought to act as a bridge linking integrin-linked kinase to NCK adaptor protein 2, which is involved in growth factor receptor kinase signaling pathways. Its localization to the periphery of spreading cells also suggests that this protein may play a role in integrin-mediated cell adhesion or spreading. Several transcript variants encoding different isoforms have been found for this gene.

Immunogen: Fusion protein of human LIMS1

Applications: ELISA, WB, IHC

Recommended Dilutions: IHC: 25-100;WB: 200-1000;ELISA: 1000-2000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG **Purification:** Antigen affinity purification **Species Reactivity:** Human, Mouse

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40%

alvcero

Research Areas: Signal Transduction, Cancer, Cardiovascular

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

Immunohistochemistry analysis of paraffin embedded Human colon cancer tissue using 217576(LIMS1 Antibody) at a dilution of 1/30(Cytoplasm).

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using 217576 (Anti-LIMS1 Antibody) at a dilution of 1/30.

In comparision with the IHC on the left, the same paraffin-embedded Human colon cancer tissue is first treated with the fusion protein and then with 217576(Anti-LIMS1 Antibody) at dilution 1/30.

In comparision with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with fusion protein and then with D222620(Anti-LIMSI Antibody) at dilution 1/30.

Gel: 8%SDS-PAGE, Lysate: 40 µg;

Lane: Mouse lung tissue;

Primary antibody: 217576(LIMS1 Antibody) at

dilution 1/200;

Secondary antibody: Goat anti rabbit IgG at

1/8000 dilution;

Exposure time: 3 minutes
