

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

MAP2 RABBIT PAB

Cat.#: S220004

Product Name: Anti-Map2 Rabbit Polyclonal Antibody

Synonyms: MAP-2; Mtap2; Mtap-2

UNIPROT ID: P20357

Background: The exact function of MAP2 is unknown but MAPs may stabilize the microtubules against depolymerization. They also seem to have a stiffening effect on microtubules. It contains 3

Tau/MAP repeats. Phosphorylated at serine residues in K-X-G-S motifs by causing

MAP/microtubule affinity-regulating kinase (MARK1 or MARK2), detachment from microtubules, and

their disassembly.

Immunogen: Synthetic peptide of mouse Map2

Applications: ELISA, IHC

Recommended Dilutions: IHC: 25-100; ELISA: 1000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG **Purification:** Antigen affinity purification **Species Reactivity:** Human, Mouse, Rat

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40%

glycerol

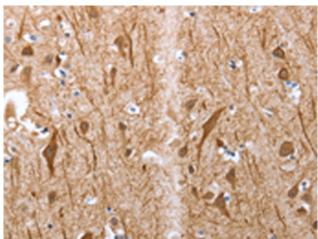

Research Areas: Signal Transduction, Neuroscience, Stem Cells

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

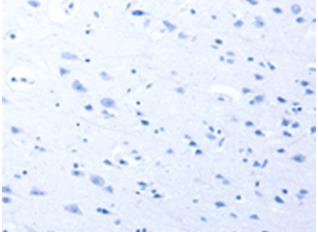

Product Description

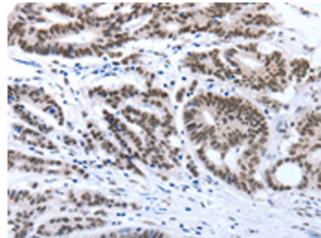

Pioneering GTPase and Oncogene Product Development since 2010

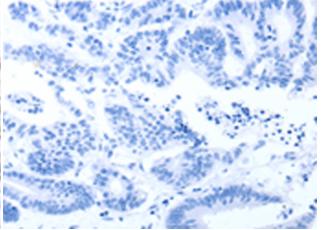

Immunohistochemistry analysis of paraffin embedded Human brain tissue using 220004(Map2 Antibody) at a dilution of 1/25(Cytoplasm, Nucleus).

In comparision with the IHC on the left, the same paraffin-embedded Human brain tissue is first treated with the synthetic peptide and then with 220004(Anti-Map2 Antibody) at dilution 1/25.

The image on the left is immunohistochemistry of paraffinembedded Human colon cancer tissue using 220004(Anti-Map2 Antibody) at a dilution of 1/25.

In comparision with the IHC on the left, the same paraffin-embedded Human colon cancer tissue is first treated with synthetic peptide and then with D260763(Anti-Map2 Antibody) at dilution 1/25.
