

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

MAPK1 RABBIT PAB

Cat.#: S216165

Product Name: Anti-MAPK1 Rabbit Polyclonal Antibody

Synonyms: ERK; p38; p40; p41; ERK2; ERT1; NS13; ERK-2; MAPK2; PRKM1; PRKM2; P42MAPK; p41mapk; p42-MAPK **UNIPROT ID:** P28482 (Gene Accession - NP_002736)

Background: This gene encodes a member of the MAP kinase family. MAP kinases, also known as extracellular signal-regulated kinases (ERKs), act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. The activation of this kinase requires its phosphorylation by upstream kinases. Upon activation, this kinase translocates to the nucleus of the stimulated cells, where it phosphorylates nuclear targets. One study also suggests that this protein acts as a transcriptional repressor independent of its kinase activity. The encoded protein has been identified as a moonlighting protein based on its ability to perform mechanistically distinct functions. Two alternatively spliced transcript variants encoding the same protein, but differing in the UTRs, have been reported for this gene.

Immunogen: Synthetic peptide of human MAPK1

Applications: ELISA, WB, IHC

Recommended Dilutions: IHC: 50-100;WB: 500-2000;ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

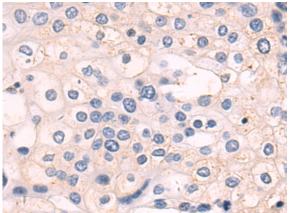

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol **Research Areas:** Neuroscience, Signal Transduction, Cancer

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

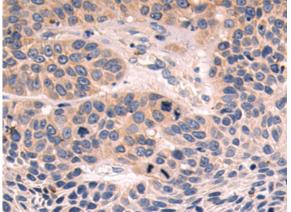

Product Description

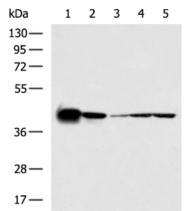

Pioneering GTPase and Oncogene Product Development since 2010

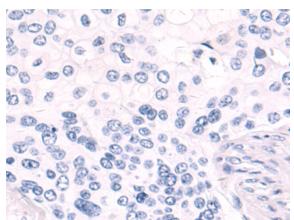

Immunohistochemistry analysis of paraffin embedded Human cervical cancer tissue using 216165(MAPK1 Antibody) at a dilution of 1/50(Cytoplasm).

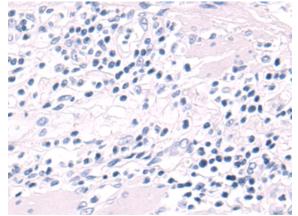

The image on the left is immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using 216165(Anti-MAPK1 Antibody) at a dilution of 1/50.

Gel: 8%SDS-PAGE, Lysate: 40 µg; Lane 1-5: Mouse brain tissue, Mouse fetal brain tissue, Mouse lung tissue, Mouse placenta tissue, LOVO cell lysates; Primary antibody: 216165(MAPK1 Antibody) at dilution 1/600; Secondary antibody: HRP-conjugated Goat anti rabbit IgG at 1/5000 dilution; Exposure time: 15 seconds

In comparision with the IHC on the left, the same paraffin-embedded Human cervical cancer tissue is first treated with the synthetic peptide and then with 216165(Anti-MAPK1 Antibody) at dilution 1/50.

In comparision with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with synthetic peptide and then with D164559(Anti-MAPK1 Antibody) at dilution 1/50.
