

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

MENIN RABBIT PAB

Cat.#: N225851 Product Name: Anti-Menin Rabbit pAb Synonyms: MEN1; SCG2; Menin UNIPROT ID: 000255

Background: Menin, the protein product of the MENI gene, is a component of the mixed-lineage leukemia protein (MLL)-containing histone methyltransferase complex that facilitates methylation of histone H3 Lys4 to promote transcriptional activation. Menin functions to suppress proliferation of pancreatic islet cells, at least in part through MLL-mediated activation of the p18INK4c (p18) and p27CIP/KIP (p27) cyclin-dependent kinase inhibitor genes.

Immunogen: A synthesized peptide derived from human Menin **Applications:** WB,IHC-P,ICC/IF,IP

Becommended Dilutions: WB:1/500-1/1000 HC:

Recommended Dilutions: WB: 1/500-1/1000 IHC: 1/50-1/100 IF: 1/50-1/200 IP: 1/20

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Clone ID: -

MW: Calculated MW: 68 kDa; Observed MW: 68 kDa

Isotype: IgG

Purification: Affinity Chromatography

Species Reactivity: Human

Conjugation: Unconjugated

Modification: Unmodified

Constituents: PBS (without Mg2+ and Ca2+), pH 7.3 containing 50% glycerol, 0.5% BSA and 0.02% sodium azide

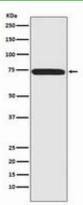

Research Areas: Epigenetics and Nuclear Signaling

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

Western blot analysis of Menin in 293T lysates using Menin antibody.
