MRE11 RABBIT PAB

Cat.#: N225805

Product Name: Anti-Mrell Rabbit pAb

Synonyms: MREII homolog I; Meiotic recombination II homolog A; MREII

homolog A; MRE11A; HNGS1; MRE11

UNIPROT ID: P49959

Background: DNA double-strand breaks are generated by ionizing radiation and endogenously produced radicals, and they often are repaired through the RAD52 homologous recombination pathway. The complex possesses single-strand endonuclease activity and double-strand-specific 3'-5' exonuclease activity, which are provided by MREIIA. RAD50 may be required to bind DNA ends and hold them in close proximity.
