

MTAP RABBIT PAB

Cat.#: S212512

Product Name: Anti-MTAP Rabbit Polyclonal Antibody

Synonyms: BDMF; MSAP; DMSFH; LGMBF; DMSMFH; c86fus; HEL-249

UNIPROT ID: Q13126 (Gene Accession - BC018625)

Background: This gene encodes an enzyme that plays a major role in polyamine metabolism and is important for the salvage of both adenine and methionine. The encoded enzyme is deficient in many cancers because this gene and the tumor suppressor p16 gene are co-deleted. Multiple alternatively spliced transcript variants have been described for this gene, but their full-length natures remain unknown.

Immunogen: Fusion protein of human MTAP

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Metabolism

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 212512(MTAP Antibody) at a dilution of 1/70(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the fusion protein and then with 212512(Anti-MTAP Antibody) at dilution 1/70.
