

NELFE RABBIT MAB

Cat.#: N262593

Product Name: Anti-NELFE Rabbit Monoclonal Antibody

Synonyms: RD; RDP; RDBP; D6S45; NELF-E

UNIPROT ID: P18615

Background: Essential component of the NELF complex, a complex that negatively regulates the elongation of transcription by RNA polymerase II. The NELF complex, which acts via an association with the DSIF complex and causes transcriptional pausing, is counteracted by the P-TEFb kinase complex. The NELF complex is involved in HIV-1 latency possibly involving recruitment of PCF11 to paused RNA polymerase II. Provides the strongest RNA binding activity of the NELF complex and may initially recruit the NELF complex to RNA. Binds to the HIV-1 TAR RNA which is located in the long terminal repeat (LTR) of HIV-1.
