

NRIP3 RABBIT PAB

Cat.#: S217656

Product Name: Anti-NRIP3 Rabbit Polyclonal Antibody

Synonyms: C11orf14; NY-SAR-105

UNIPROT ID: Q9NQ35 (Gene Accession - BC008835)

Background: NRIP3 (nuclear receptor interacting protein 3), also known as C11orf14 or NY-SAR-105, is a 241 amino acid protein that is encoded by a gene which maps to human chromosome 11. With approximately 135 million base pairs and 1,400 genes, chromosome 11 comprises approximately 4% of human genomic DNA and is considered a gene and disease association dense chromosome. The chromosome 11 encoded Atm gene is important for regulation of cell cycle arrest and apoptosis following double strand DNA breaks.

Immunogen: Fusion protein of human NRIP3

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 2000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Cancer, Cell Biology

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 217656(NRIP3 Antibody) at a dilution of 1/60(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the fusion protein and then with 217656(Anti-NRIP3 Antibody) at dilution 1/60.
