

PGBD5 RABBIT PAB

Cat.#: S220025

Product Name: Anti-PGBD5 Rabbit Polyclonal Antibody

Synonyms:

UNIPROT ID: Q8N414 (Gene Accession - NP_001245240)

Background: The piggyBac family of proteins, found in diverse animals, are transposases related to the transposase of the canonical piggyBac transposon from the moth, *Trichoplusia ni*. This family also includes genes in several genomes, including human, that appear to have been derived from the piggyBac transposons. This gene belongs to the subfamily of piggyBac transposable element derived (PGBD) genes. The PGBD proteins appear to be novel, with no obvious relationship to other transposases, or other known protein families.

Immunogen: Synthetic peptide of human PGBD5

Applications: ELISA, IHC

Recommended Dilutions: IHC: 25-100; ELISA: 2000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

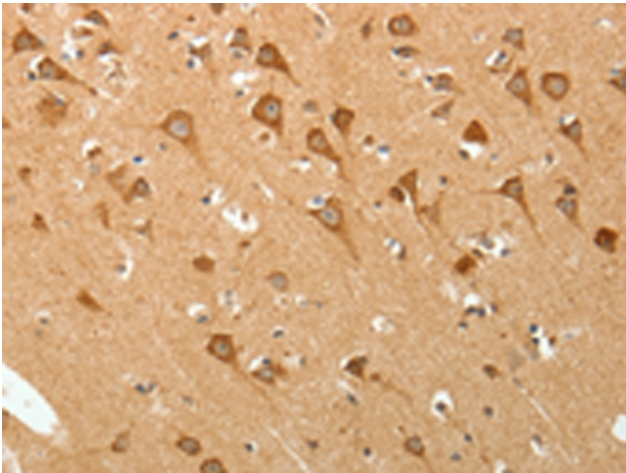

Purification: Antigen affinity purification

Species Reactivity: Human

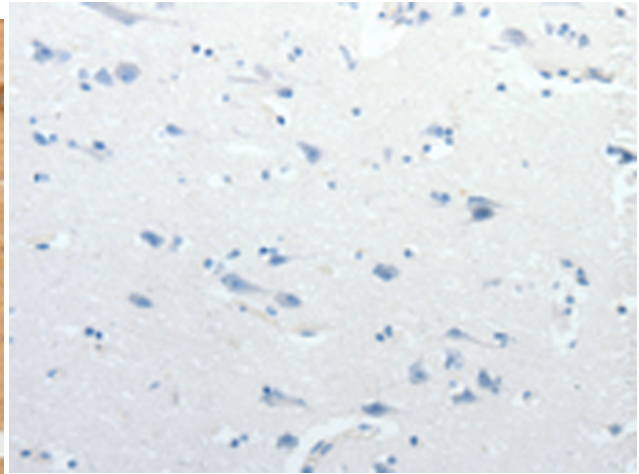

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Cell Biology

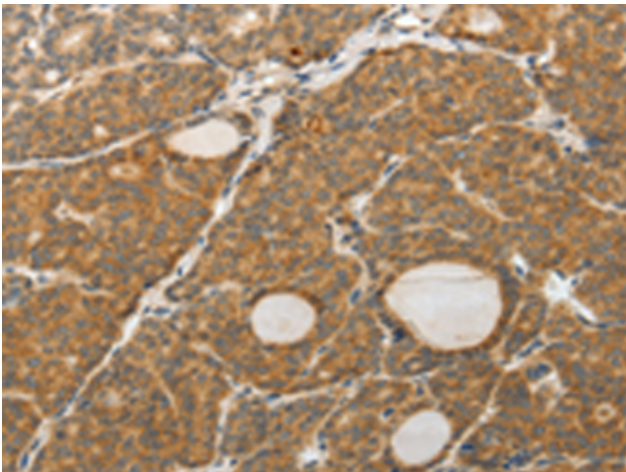

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

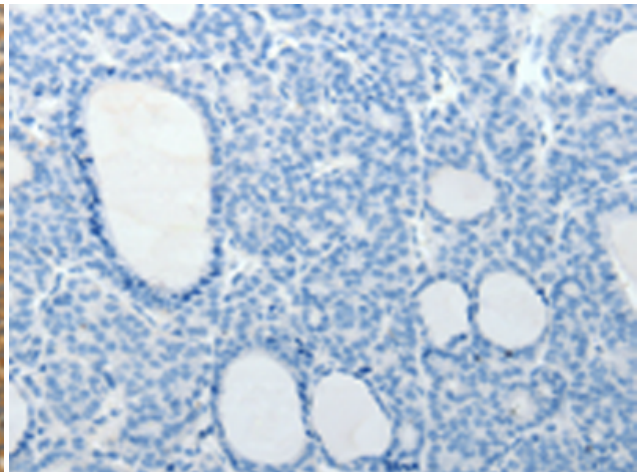

Immunohistochemistry analysis of paraffin embedded Human brain tissue using 220025(PGBD5 Antibody) at a dilution of 1/20(Membrane, Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human brain tissue is first treated with the synthetic peptide and then with 220025(Anti-PGBD5 Antibody) at dilution 1/20.

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using 220025(Anti-PGBD5 Antibody) at a dilution of 1/20.

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with synthetic peptide and then with D260797(Anti-PGBD5 Antibody) at dilution 1/20.
