

## **Product Description**

Pioneering GTPase and Oncogene Product Development since 2010

## **PPOX RABBIT PAB**

Cat.#: S218887

**Product Name:** Anti-PPOX Rabbit Polyclonal Antibody

**Synonyms:** VP; PPO; V290M

UNIPROT ID: P50336 (Gene Accession - BC002357)

**Background:** This gene encodes the penultimate enzyme of heme biosynthesis, which catalyzes the 6-electron oxidation of protoporphyrinogen IX to form protoporphyrin IX. Mutations in this gene cause variegate porphyria, an autosomal dominant disorder of heme metabolism resulting from a deficiency in protoporphyrinogen oxidase, an enzyme located on the inner mitochondrial membrane. Alternatively spliced transcript variants encoding the same protein have been identified.

Immunogen: Fusion protein of human PPOX

**Applications:** ELISA, IHC

**Recommended Dilutions:** IHC: 30-150; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

**Isotype:** Immunogen-specific rabbit IgG **Purification:** Antigen affinity purification **Species Reactivity:** Human, Mouse, Rat

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40%

glycerol

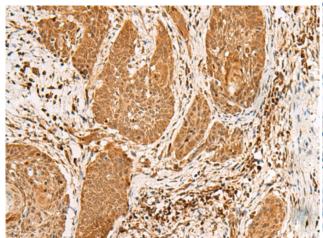

Research Areas: Metabolism

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

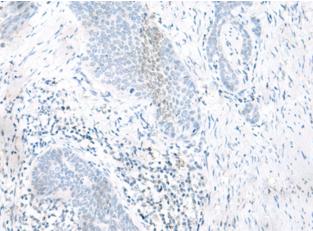

## **Product Description**

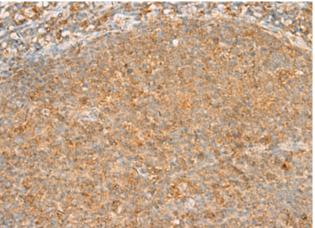

Pioneering GTPase and Oncogene Product Development since 2010

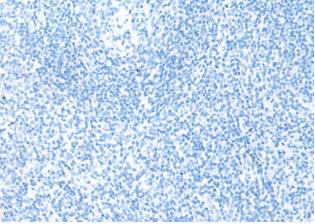

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 218887(PPOX Antibody) at a dilution of 1/30(Cytoplasm and Nucleus).

In comparision with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 218887(Anti-PPOX Antibody) at dilution 1/30.

The image on the left is immunohistochemistry of paraffinembedded Human tonsil tissue using 218887(Anti-PPOX Antibody) at a dilution of 1/30.

In comparision with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with fusion protein and then with D225441(Anti-PPOX Antibody) at dilution 1/30.
