

PTPN11 RABBIT PAB

Cat.#: S216775

Product Name: Anti-PTPN11 Rabbit Polyclonal Antibody

Synonyms: CFC; NSI; JMML; SHP2; BPTP3; PTP2C; METCDS; PTP-ID; SH-PTP2; SH-PTP3

UNIPROT ID: Q06124 (Gene Accession - BC008692)

Background: The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation. This PTP contains two tandem Src homology-2 domains, which function as phospho-tyrosine binding domains and mediate the interaction of this PTP with its substrates. This PTP is widely expressed in most tissues and plays a regulatory role in various cell signaling events that are important for a diversity of cell functions, such as mitogenic activation, metabolic control, transcription regulation, and cell migration. Mutations in this gene are a cause of Noonan syndrome as well as acute myeloid leukemia.

Immunogen: Fusion protein of human PTPN11

Applications: ELISA, WB, IHC

Recommended Dilutions: IHC: 50-200;WB: 500-2000;ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Signal Transduction, Neuroscience

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 216775(PTPN11 Antibody) at a dilution of 1/60(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 216775(Anti-PTPN11 Antibody) at dilution 1/60.

The image on the left is immunohistochemistry of paraffin-embedded Human colorectal cancer tissue using 216775(Anti-PTPN11 Antibody) at a dilution of 1/60.

In comparison with the IHC on the left, the same paraffin-embedded Human colorectal cancer tissue is first treated with fusion protein and then with D221216(Anti-PTPN11 Antibody) at dilution 1/60.

Gel: 8%SDS-PAGE, Lysate: 40 µg;
 Lane 1-3: NIH/3T3, 293T, 231 cell lysates;
 Primary antibody: 216775(PTPN11 Antibody) at dilution 1/400;
 Secondary antibody: HRP-conjugated Goat anti rabbit IgG at 1/5000 dilution;
 Exposure time: 20 seconds

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
