

RAB2A RABBIT PAB

Cat.#: S217730

Product Name: Anti-RAB2A Rabbit Polyclonal Antibody

UNIPROT ID: P61019 (Gene Accession - BC008929)

Background: The protein encoded by this gene belongs to the Rab family, members of which are small molecular weight guanosine triphosphatases (GTPases) that contain highly conserved domains involved in GTP binding and hydrolysis. The Rabs are membrane-bound proteins, involved in vesicular fusion and trafficking. This protein is a resident of pre-Golgi intermediates, and is required for protein transport from the endoplasmic reticulum (ER) to the Golgi complex.
