

## RAIDD RABBIT MAB

**Cat.#:** N262809

**Product Name:** Anti-RAIDD Rabbit Monoclonal Antibody

**Synonyms:** CRADD; MGC9163; RAIDD; Death adaptor molecule RAIDD; Death domain containing protein CRADD

**UNIPROT ID:** P78560

**Background:** The receptor interacting protein RIP is a death domain-containing serine/threonine kinase which associates with FAS or the TNF-R1 binding protein TRADD. RAIDD (RIP-associated ICH-1/Ced-3 homologous protein with a death domain) has been identified as a RIP binding protein that also associates with members of the caspase family, providing a link between activation of the TNF-Rs and the triggering of the cysteine protease cascade. The amino-terminal domain of RAIDD shares significant homology with the prodomain of ICH-1 and mediates the binding of RAIDD to this cysteine protease.

**Immunogen:** A synthetic peptide of human RAIDD

**Applications:** WB,IP

**Recommended Dilutions:** WB: 1/500-1/1000 IP: 1/20

**Host Species:** Rabbit

**Clonality:** Rabbit Monoclonal

**Clone ID:** R08-1F1

**MW:** Calculated MW: 23 kDa; Observed MW: 23 kDa

**Isotype:** IgG

**Purification:** Affinity Purified

**Species Reactivity:** Human

**Conjugation:** Unconjugated

**Modification:** Unmodified

**Constituents:** PBS (without Mg<sup>2+</sup> and Ca<sup>2+</sup>), pH 7.3 containing 50% glycerol, 0.5% BSA and 0.02% sodium azide

**Research Areas:** Cell Biology

**Storage & Shipping:** Store at -20°C. Avoid repeated freezing and thawing

Western blot analysis of RAIDD in K562 lysates using RAIDD antibody.
