

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

SCN1A RABBIT PAB

Cat.#: S220188

Product Name: Anti-SCN1A Rabbit Polyclonal Antibody

Synonyms: FEB3; FHM3; NAC1; SCN1; SMEI; EIEE6; FEB3A; HBSCI; GEFSP2; Nav1.1

UNIPROT ID: P35498 (Gene Accession - NP_001159435)

Background: The vertebrate sodium channel is a voltage-gated ion channel essential for the generation and propagation of action potentials, mainly in nerve and muscle. Voltage-sensitive sodium channels are heteromeric complexes consisting of a large central pore-forming glycosylated alpha subunit, and two smaller auxiliary beta subunits. This gene encodes the large alpha subunit, and mutations in this gene have been associated with several epilepsy, convulsion and migraine disorders. Alternative splicing results in multiple transcript variants. The RefSeq Project has decided to create four representative RefSeq records. Three of the transcript variants are supported by experimental evidence and the fourth contains alternate 5' untranslated exons, the exact combination of which have not been experimentally confirmed for the full-length transcript.

Immunogen: Synthetic peptide of human SCN1A

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 2000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG **Purification:** Antigen affinity purification

Species Reactivity: Human, Rat

Constituents: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40%

glycerol

Research Areas: Neuroscience

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

Immunohistochemistry analysis of paraffin embedded Human cervical cancer tissue using 220188(SCNIA Antibody) at a dilution of 1/50(Cytoplasm, Nucleus).

In comparision with the IHC on the left, the same paraffin-embedded Human cervical cancer tissue is first treated with the synthetic peptide and then with 220188(Anti-SCNIA Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffinembedded Human esophagus cancer tissue using 220188(Anti-SCNIA Antibody) at a dilution of 1/50.

In comparision with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with synthetic peptide and then with D261106(Anti-SCN1A Antibody) at dilution 1/50.
