

SGCA RABBIT PAB

Cat.#: S218600

Product Name: Anti-SGCA Rabbit Polyclonal Antibody

Synonyms: ADL; DAG2; 50DAG; DMDA2; LGMD2D; SCARMD1; adhalin

UNIPROT ID: Q16586 (Gene Accession - BC025702)

Background: This gene encodes a component of the dystrophin-glycoprotein complex (DGC), which is critical to the stability of muscle fiber membranes and to the linking of the actin cytoskeleton to the extracellular matrix. Its expression is thought to be restricted to striated muscle. Mutations in this gene result in type 2D autosomal recessive limb-girdle muscular dystrophy. Multiple transcript variants encoding different isoforms have been found for this gene.

Immunogen: Fusion protein of human SGCA

Applications: ELISA, IHC

Recommended Dilutions: IHC: 25-100; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Signal Transduction

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 218600(SGCA Antibody) at a dilution of 1/35(Cytoplasm or Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the fusion protein and then with 218600(Anti-SGCA Antibody) at dilution 1/35.

The image on the left is immunohistochemistry of paraffin-embedded Human lung cancer tissue using 218600(Anti-SGCA Antibody) at a dilution of 1/35.

In comparison with the IHC on the left, the same paraffin-embedded Human lung cancer tissue is first treated with fusion protein and then with D224784(Anti-SGCA Antibody) at dilution 1/35.
