

## STAB1 RABBIT PAB

**Cat.#:** S220975

**Product Name:** Anti-STAB1 Rabbit Polyclonal Antibody

**Synonyms:** FEX1; FEEL1; FEEL-1; FELE-1; SCARH2; STAB-1; CLEVER-1

**UNIPROT ID:** Q9NY15 (Gene Accession - NP\_055951)

**Background:** This gene encodes a large, transmembrane receptor protein which may function in angiogenesis, lymphocyte homing, cell adhesion, or receptor scavenging. The protein contains 7 fasciclin, 16 epidermal growth factor (EGF)-like, and 2 laminin-type EGF-like domains as well as a C-type lectin-like hyaluronan-binding Link module. The protein is primarily expressed on sinusoidal endothelial cells of liver, spleen, and lymph node. The receptor has been shown to endocytose ligands such as low density lipoprotein, Gram-positive and Gram-negative bacteria, and advanced glycosylation end products. Supporting its possible role as a scavenger receptor, the protein rapidly cycles between the plasma membrane and early endosomes.

**Immunogen:** Synthetic peptide of human STAB1

**Applications:** ELISA, IHC

**Recommended Dilutions:** IHC: 50-200; ELISA: 5000-10000

**Host Species:** Rabbit

**Clonality:** Rabbit Polyclonal

**Isotype:** Immunogen-specific rabbit IgG

**Purification:** Antigen affinity purification

**Species Reactivity:** Human, Mouse

**Constituents:** PBS (without Mg<sup>2+</sup> and Ca<sup>2+</sup>), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

**Research Areas:** Signal Transduction, Cardiovascular

**Storage & Shipping:** Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 220975 (STAB1 Antibody) at a dilution of 1/50 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the synthetic peptide and then with 220975 (Anti-STAB1 Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffin-embedded Human breast cancer tissue using 220975 (Anti-STAB1 Antibody) at a dilution of 1/50.

In comparison with the IHC on the left, the same paraffin-embedded Human breast cancer tissue is first treated with synthetic peptide and then with D262309 (Anti-STAB1 Antibody) at dilution 1/50.
